CO-FOUNDER
LEE LOVETT

A passion for lighting led to
the creation of the company.

ABOUT US

Our story begins in Soho, London in 2017. We struggled to find the right lighting and switches for our own renovation projects, refurbishing historical buildings in one of the capital's most characterful neighbourhoods.

Passionate about interior design and with a firm belief in the transformative power of lighting, we saw an opportunity to create beautiful lighting, switches and sockets inspired by period properties yet adapted and technically enhanced for modern living.

Pieces that elevate and enlighten, are reliable, high performing and responsibly made; that offer more than just good looks, marrying form with function for visual comfort and pitch perfect ambiance. So we set up The Soho Lighting Company, creating superior lighting, switches and sockets enabled by innovative technology to help you bring your home to life.

“Lighting can make or break even the most carefully designed interior. It is both an art and a science, with the ability to elevate a space and reveal its true potential.”

Lee Lovett, co-Founder & Creative Director

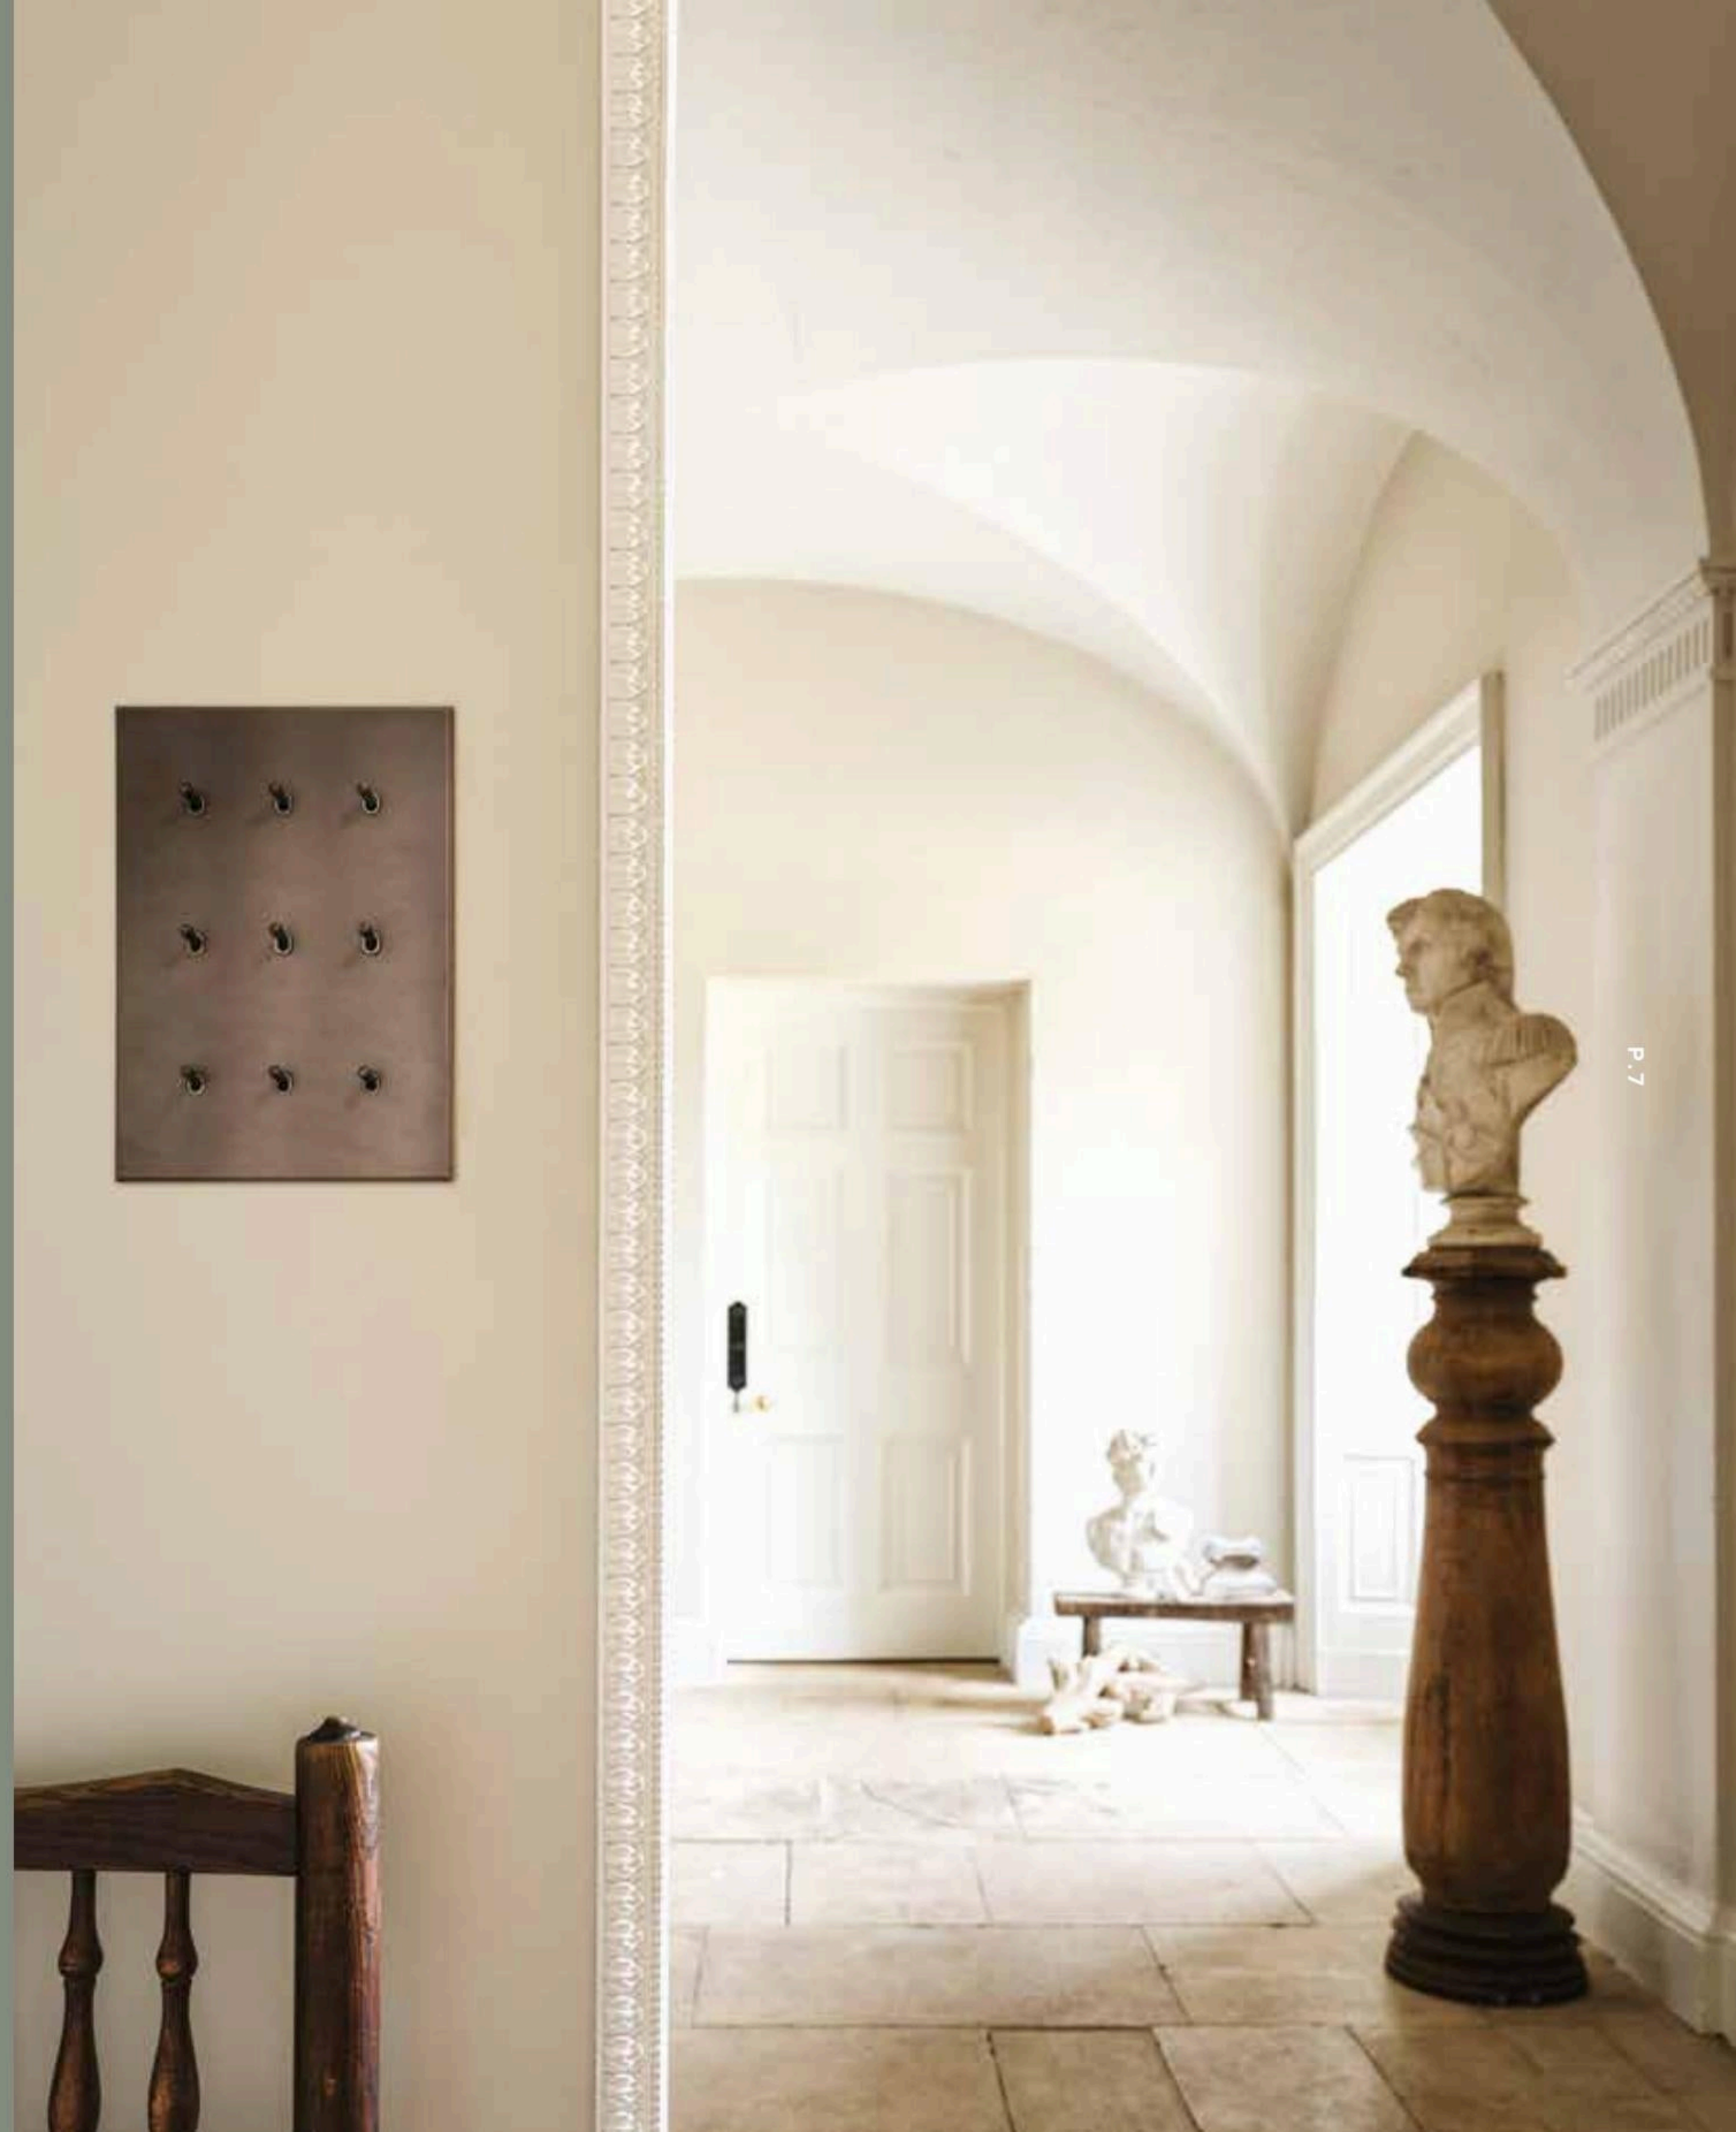

OUR
Design
philosophy

It's in the detail...

We engage more with switches and sockets than any other design feature within an interior.

Our switches and sockets are available in 12 exquisite finishes and three distinctive plate styles – traditional, minimalist, and historically inspired allowing you to create a truly unique and luxurious interior scheme where every detail is carefully curated.

From traditional finishes like Antique and Vintage Brass, paintable plates that seamlessly disappear into your paintwork, to more contemporary White Metal, you have a wealth of choice at your fingertips.

Our dedication to sustainability extends beyond our products to encompass people, the planet and our community.

Pioneering circularity in design

Sustainable quality without compromise

At Soho Lighting, our product design, development and manufacturing are guided by a deep respect for tradition and a profound understanding of the finite nature of our global resources. We embrace the timeless values of “built to last” and recognise the importance of responsible production. We are on a journey towards B Corp accreditation and are proud to have recently become carbon neutral.

Designing for longevity

From the very beginning, we rejected the modern approach of creating sealed, unrepairable units, driven by economy over style. Instead, we opted for our unique design philosophy that ensures durability and serviceability at every stage of the process. Our switches are built with a robust solid metal backplate utilising the highest quality materials and components. Each product is meticulously assembled, tested and finished by hand, undergoing a rigorous final inspection to meet our exacting standards.

Reducing plastic waste

Our dedication to sustainability extends beyond our products to our packaging. We’ve taken strides to reduce plastic waste, achieving a remarkable 97% reduction in plastic use in our packaging materials. It’s a small step towards a greener future, but every step counts.

Peace of mind, guaranteed

We believe in the longevity of our products, and we back it up with a 15-year guarantee offered as standard on most of our items. This guarantee not only ensures outstanding looks, performance and durability but also provides enduring peace of mind to you, our valued customers. By choosing Soho Lighting, you’re not just investing in quality, you’re joining us on a journey toward a more sustainable and responsible future.

Dimming at Soho Lighting

We are electrical engineers. We are proudly partnered with Enkin technology who design and engineer all the electronic function behind our switch and sockets.

ENKIN

THE SOHO LIGHTING CO.

Our pioneering dimming technology has been designed by our award-winning technology partner, Enkin, to eradicate the compatibility and buzzing issues so often found with dimming switches. Choose from four elegant dimming solutions:

The Smart Dimming Toggle

Our Smart Dimming Toggles now boast voice and phone app-activation, game-changing technology that brings the benefits of home automation without the costly and complex installation, enabling you to voice activate our lighting, control it from your tablet or phone from any location or more traditionally dim your lighting from your toggle switch.

The Rotary

The traditional dimming choice, the Rotary exudes tactile elegance, offering seamless control. Its smooth rotation embodies intuitive design, blending functionality with aesthetic refinement.

The Dimming Toggle

Our original dimming toggle which, since its launch in 2022, has pioneered the market, melding the functional aspect of a dimmer with the elegance of a toggle. Our dimming toggles have revolutionised the way we light our homes; their multi-locational capability means you can separately dim from any number of toggles in the same room, allowing you to change the atmosphere, vitality and ambiance of a space at the flick of a switch.

The Push Button

An elegant addition to our dimming collection, the Push Button offers a sleek, modern design for those who love a contemporary aesthetic. The clean lines and smooth button give a pared-back, sophisticated feel, alongside its practical functionality.

The beauty of the past, reimagined

SOHO LIGHTING X HISTORIC ROYAL PALACES

Following two years of exploration behind the scenes of historic treasures at Hampton Court Palace and Kensington Palace, The Palaces Collection takes its inspiration from the architecture, interiors and gardens of the palaces; extracting the essence of a pattern, an artefact, a finish, switch, socket or light to create a collection that reflects the history and character of these beautiful spaces.

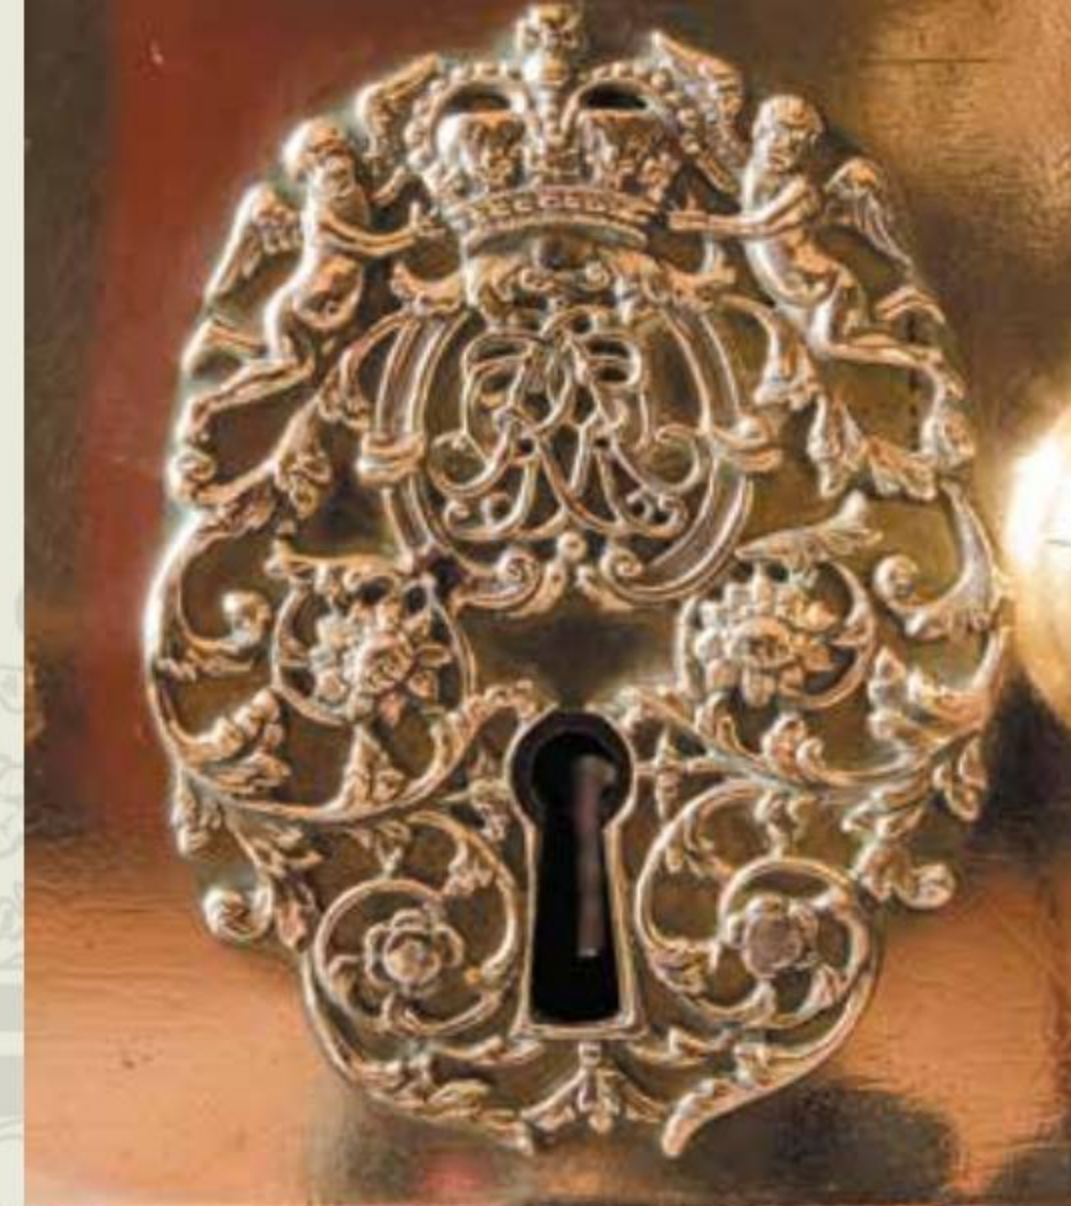

THE SOHO LIGHTING CO.

Behind the design

Marrying elegant aesthetics and innovative technology, the panel-mounted plates are a faithful representation of original hardware and finishes found in the palaces. Handcrafted from solid brass and sitting flush to the wall, they are traditional in style but backed by cutting-edge functionality.

The state-of-the-art MagnaTec™ plate system dramatically simplifies installation whilst creating a truly flawless and screwless finish. Available in three stunning finishes – Natural Brass, Aged Brass and Heritage Bronze - the collection is set to evolve further with additional finishes, toggle designs and lighting. Our Bespoke Engraving service offers a further mark of distinction.

AVAILABLE IN THREE UNIQUE FINISHES

Aged Brass

Heritage Bronze

Natural Brass

“Each solid brass finish has been meticulously matched to those found in the royal palaces. Handcrafted to bring a sense of grandeur and refinement, it is a privilege to share this journey of artistry and tradition with you.”

LEE LOVETT, CO-FOUNDER & CREATIVE DIRECTOR

INTRODUCING
Soho Lighting's
BESPOKE ENGRAVING
SERVICE

Personalise your space

Many of us experience the process of guessing which switch controls which set of lights. Our bespoke engraving service removes this frustration, enabling a clear and simple lighting navigation.

Our customisation service includes:

- Custom engravings with a selection of fonts
- Custom pairing of finishes with our extensive choice of toggle and dimming knob designs

We believe by providing these extra layers of customisation, your switches and sockets will truly reflect your unique style and design needs.

Our personal service

THE SOHO LIGHTING CO.

Handcrafting in the UK enables us to adapt our products and services to your unique requirements.

INDUSTRY EXPERTS

Our integrated approach to each project

When you choose Soho Lighting, you are gaining the expertise of our team of professional electricians who, alongside our customer service team, aim to deliver your project with care, efficiency and expertise. We offer expert technical advice on switches & sockets, wiring design, extractions from plan and lighting design scoping calls; with each project overseen by a dedicated account manager. From an initial call, through to project scoping, sample room creation, to site visits, and on-time delivery, we are on hand for the duration of your project.

For more information about this service, please contact our customer service team on 0208 106 1221 or by email at info@soholighting.com

Independent Lighting Plan Consultancy

Introducing one of our valued independent lighting consultants
Claire Pendarves

We offer the opportunity to engage with an independent lighting consultant. Claire Pendarves originally trained and worked as an interior designer in London before changing course to specialise in lighting. For more information about this service, please contact our customer service team.

" It was whilst working on an interior design project in Switzerland that a renowned lighting consultant was commissioned to carry out the lighting design. I realised that no matter what attention is paid to furniture, fabrics, flooring and window treatments it's the lighting predominantly that can totally transform a space. It can change a mundane interior into something spectacular. It can accentuate good features and help to detract from the negative. *"* And it can make your life easier and more harmonious. *"*

Residential Case Study

Clay Point

“I don’t think my husband and I would have ended up with what we’ve got, in terms of lighting, switches and sockets, if we hadn’t had a team working with us like Soho Lighting. They came up with so many ideas. We couldn’t have worked with a better company.”

Kate and Malcolm Roberts

This stunning coastal, residential project involved an extensive renovation, transforming the period property into a contemporary family home. Using our independent lighting plan service, we provided the client with a comprehensive lighting, switch and socket scheme.

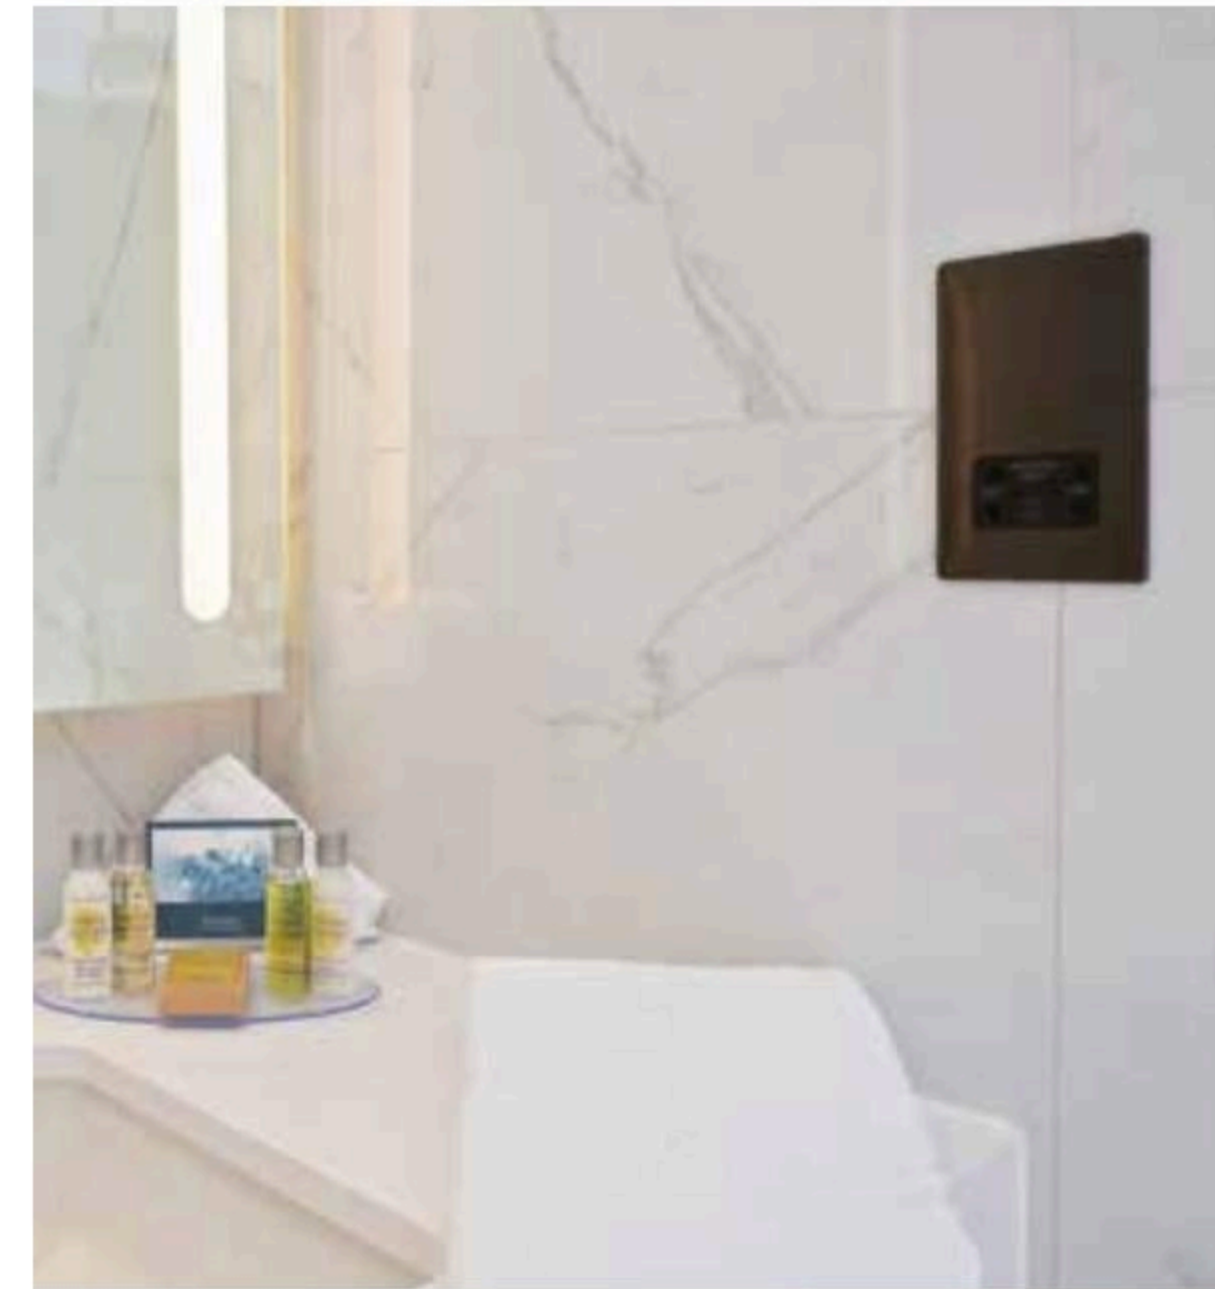

Commercial Case Study

Hilton Hotel

The Hilton Metropole is the second largest hotel in London. We were delighted to be selected to provide the switches and sockets for this extensive hotel renovation. Our Connaught Collection in Black Nickel provided a sleek finish in the hotel bedrooms and our Charterhouse Collection in antique brass delivered a sophisticated and classic aesthetic for the bathrooms. Our ability to scale our service for large commercial projects is a quality for which we have become renowned, and we are honoured to extend our relationship with new Hilton hotels year on year.

Our collections

THE SOHO LIGHTING CO.

Beautifully designed, meticulously engineered and available in an array of classic and contemporary finishes.

AN INTRODUCTION TO Our plate styles

At The Soho Lighting Company, we understand that every detail matters which is why we offer a variety of plate styles to cater to your unique preferences and interior design needs.

SECTIONS 1&2

Traditional Plate:

TIMELESS ELEGANCE

Our traditional plates are available in a stunning array of 12 finishes. These hand-crafted front plates exude an understated elegance and feature subtle rounded edges and a unique invisible fixing system for a screwless finish.

Flat Plate:

MODERN SIMPLICITY

For those who prefer a contemporary aesthetic, our minimalist flat plate design is the ideal choice. The sleek front plate embodies style and simplicity, making it ideal for contemporary interiors.

SECTION 3

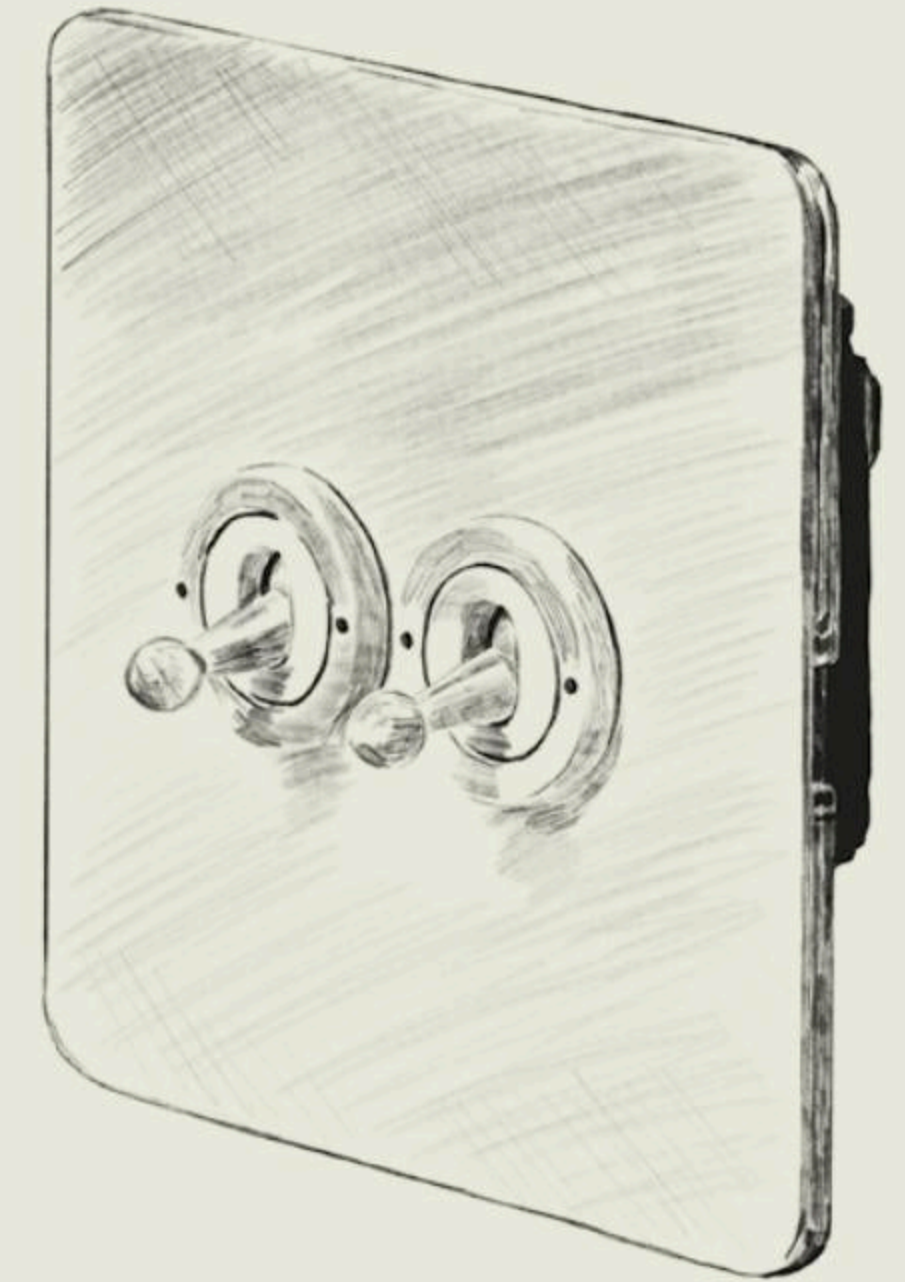

Historic Royal Palaces: The Palaces Collection

LUXURY & REFINEMENT

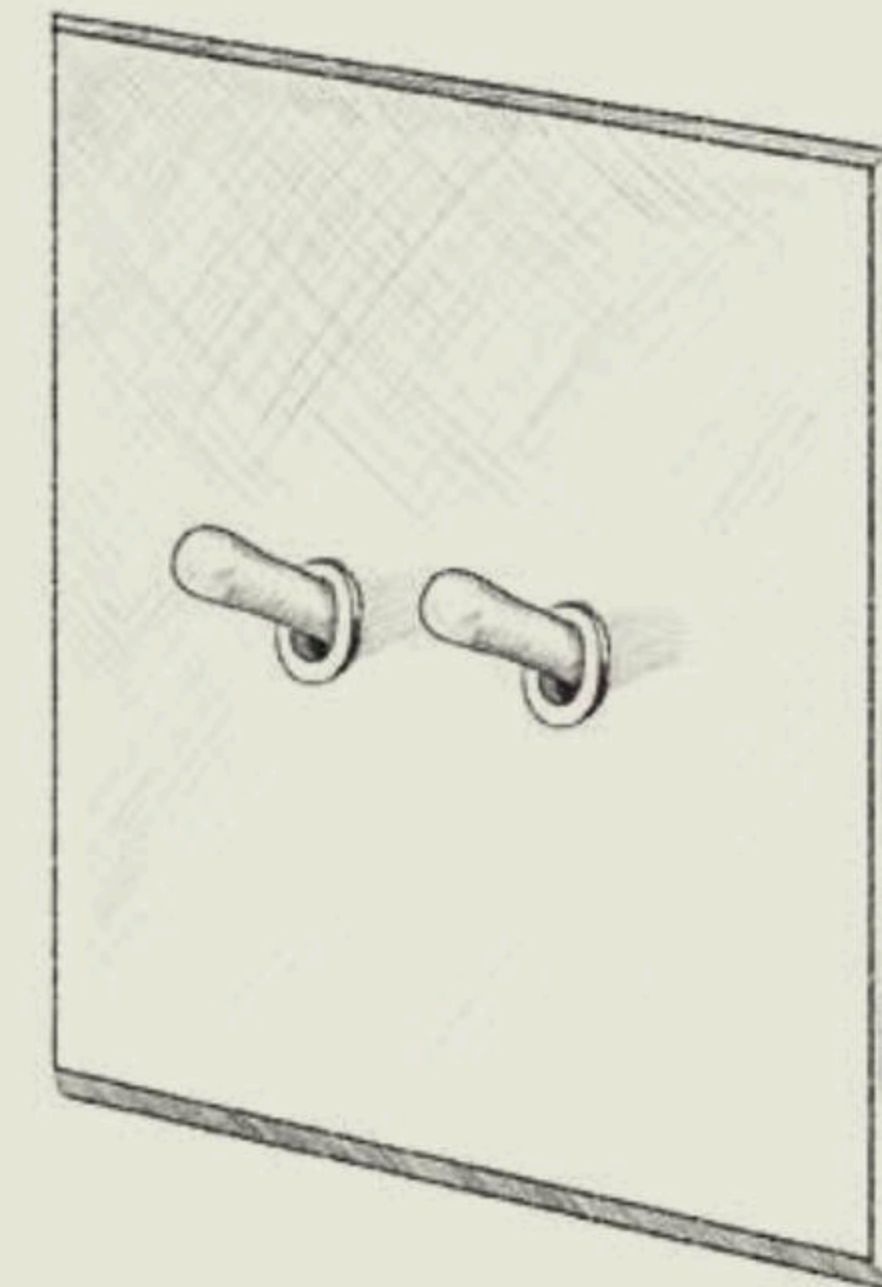

Handcrafted from solid brass and sitting flush to the wall, these elegant plates are traditional in style but backed by cutting-edge functionality, offering a lifetime of interchangeable potential. Our state-of-the-art MagnaTec™ system will dramatically simplify installation whilst creating a flawless and screwless finish.

Traditional Plate

Flat Plate

Historic Royal Palaces : The Palaces Collection

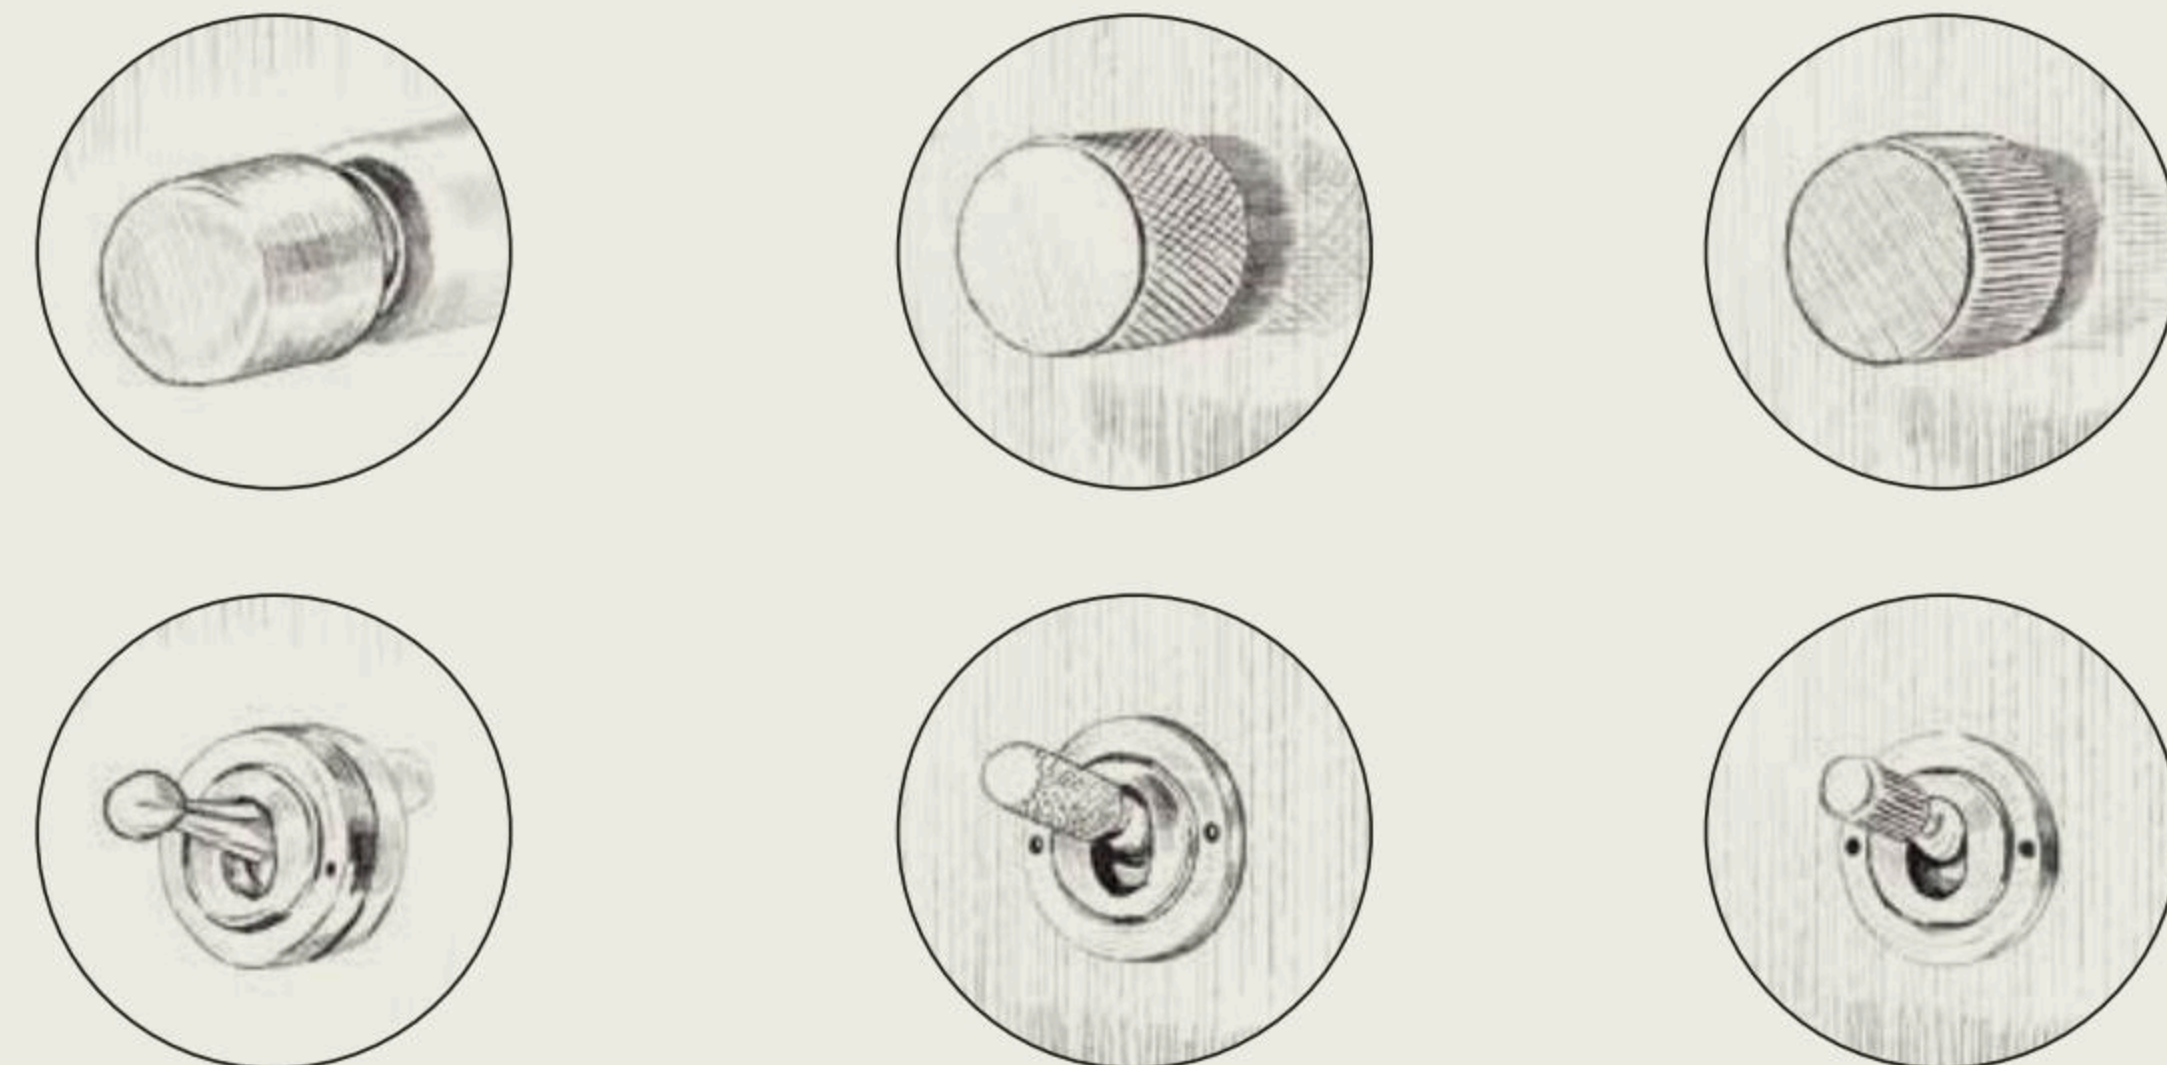

AN INTRODUCTION TO
**Our decorative
 switch options**

The Palaces Collection

TRADITIONAL AND FLAT PLATE COLLECTIONS

Three timeless rotary and toggle designs.

Classic

Vintage Knurled

Art Deco

Sleek and timeless, our classic toggle dimmer design is available as both a tactile toggle switch and a traditional rotary, allowing you to click or turn to dim with precision and style.

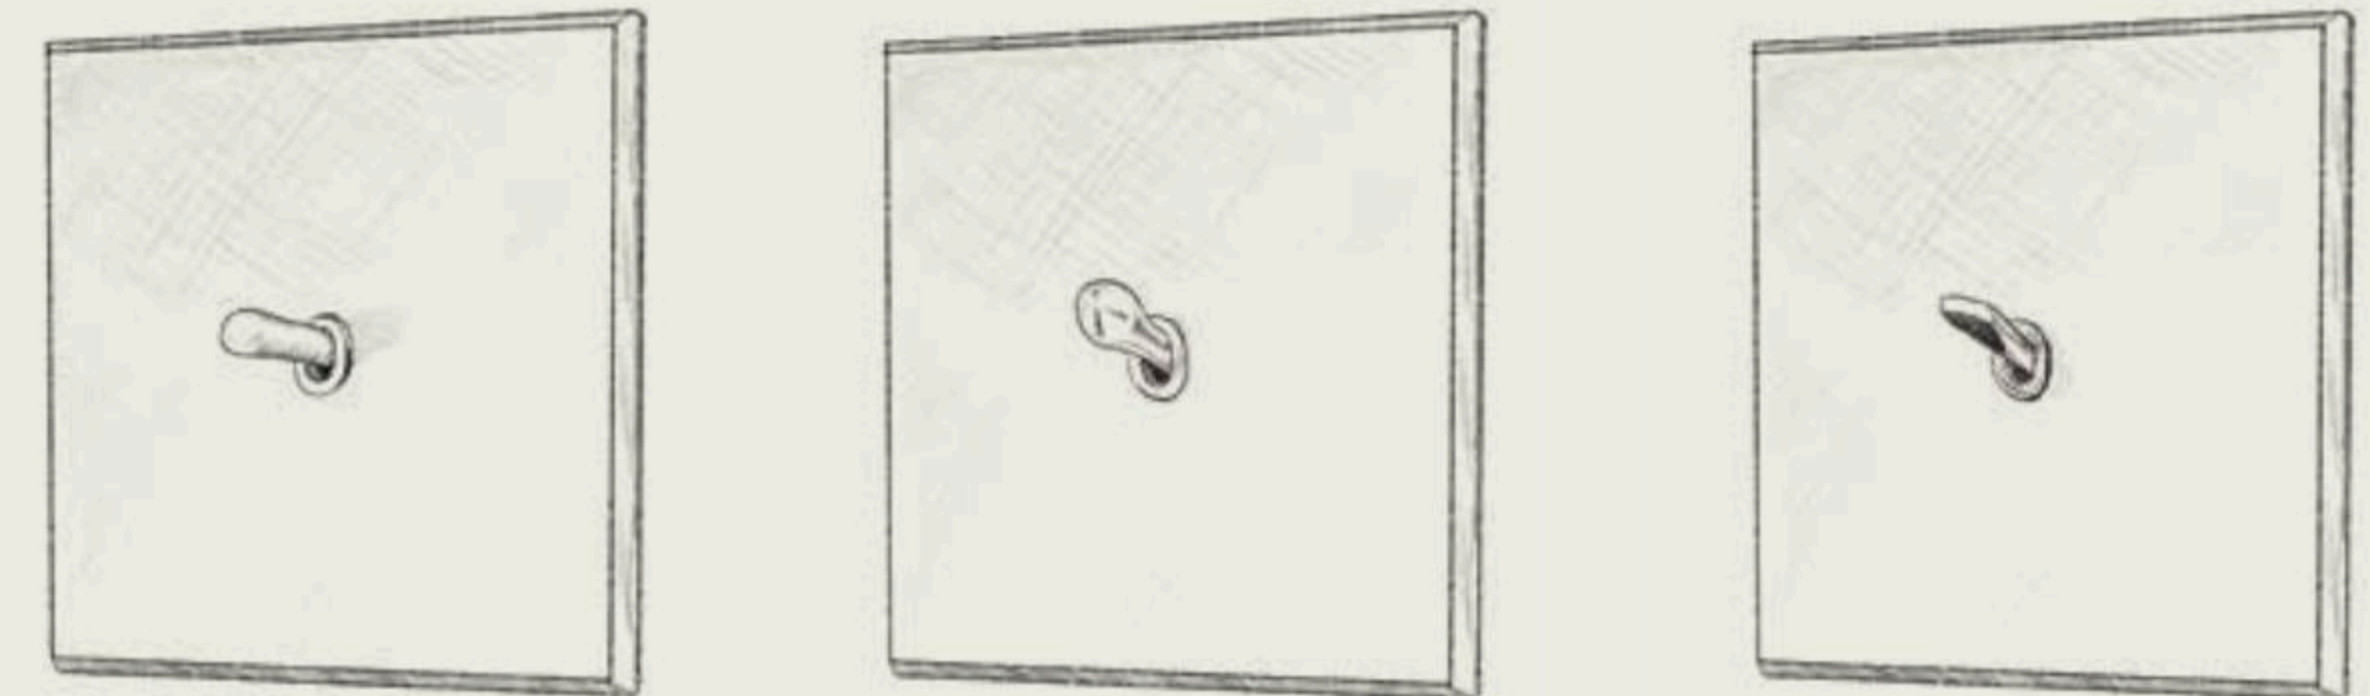

For those drawn to a vintage aesthetic, our vintage knurled toggle and rotary design features a beautifully textured switch and rotary dial, delivering tactile elegance and a sense of crafted authenticity in every interaction.

With its clean geometric lines and refined symmetry, this toggle and rotary design channels the elegance and glamour of classic Art Deco style.

Discover more on p. 33

TRADITIONAL AND FLAT PLATE COLLECTIONS

Each precious moment spent behind the scenes of the palaces has been poured into this collection to capture the beauty of the palaces in every handcrafted detail. The three toggle designs are inspired by distinctive and captivating features discovered within these historic homes and are available in Brass and soon-to-launch Heritage Bronze.

Classic

Ball

Paddle

The Classic Toggle echoes the pared-back luxury of The Palaces Collection plates, offering clean lines, subtle detailing and a discreet, sophisticated style.

A sculptural orb-like toggle, the Ball Toggle's tactile shape gives this hardware purpose, offering a satisfying, intuitive interaction that blends form, function and timeless appeal.

For those who prefer a more contemporary style, the Paddle offers the same intuitive dimming switch experience as our Classic Toggle, but with a flat, streamlined form.

Discover more on p. 61

SECTIONS 1&2

Traditional & Flat Plates

Our traditional plates are available in a stunning array of 12 finishes. These hand-crafted front plates exude an understated elegance, feature subtle rounded edges and a unique invisible fixing system for a screwless finish.

Historic Royal Palaces: The Palaces Collection

A truly special collaboration with Historic Royal Palaces, the independent charity that cares for several renowned historic sites across the UK, The Palaces Collection is a range of switches inspired by the opulence, artistry and heritage of royal interiors. Handcrafted from solid brass, each piece echoes the grandeur of the palaces that inspired it: timeless in design, rich in story and quietly concealing state-of-the-art technology within.

HISTORIC ROYAL PALACES

The Palaces Collection

● AGED BRASS

Our Aged Brass finish embodies the history and craftsmanship of the palaces. Treated to evoke an antique appearance, it will add character and depth to your interior. This finish has a slight patina and subtle variations to mimic the effects of the past. Available in a wealth of options, our Palaces Collection switches are powered by industry-leading Enkin technology, offering intelligent dimming across the range.

EXPLORE OUR CUSTOM-MADE SWITCH & SOCKET OPTIONS

For Endless Possibilities

Through our highly flexible and adaptable plate systems, coupled with an extensive range of grid modules, we've made sure that you never have to compromise on aesthetics or functionality.

Our flexible grid systems offer over 10,000 unique plate/switch combinations, readily available for next-day delivery.

Whether you're matching round aperture grid modules for toggle and dimmer switches or rectangular grid modules for rocker switches, the possibilities are endless - all on a single plate.

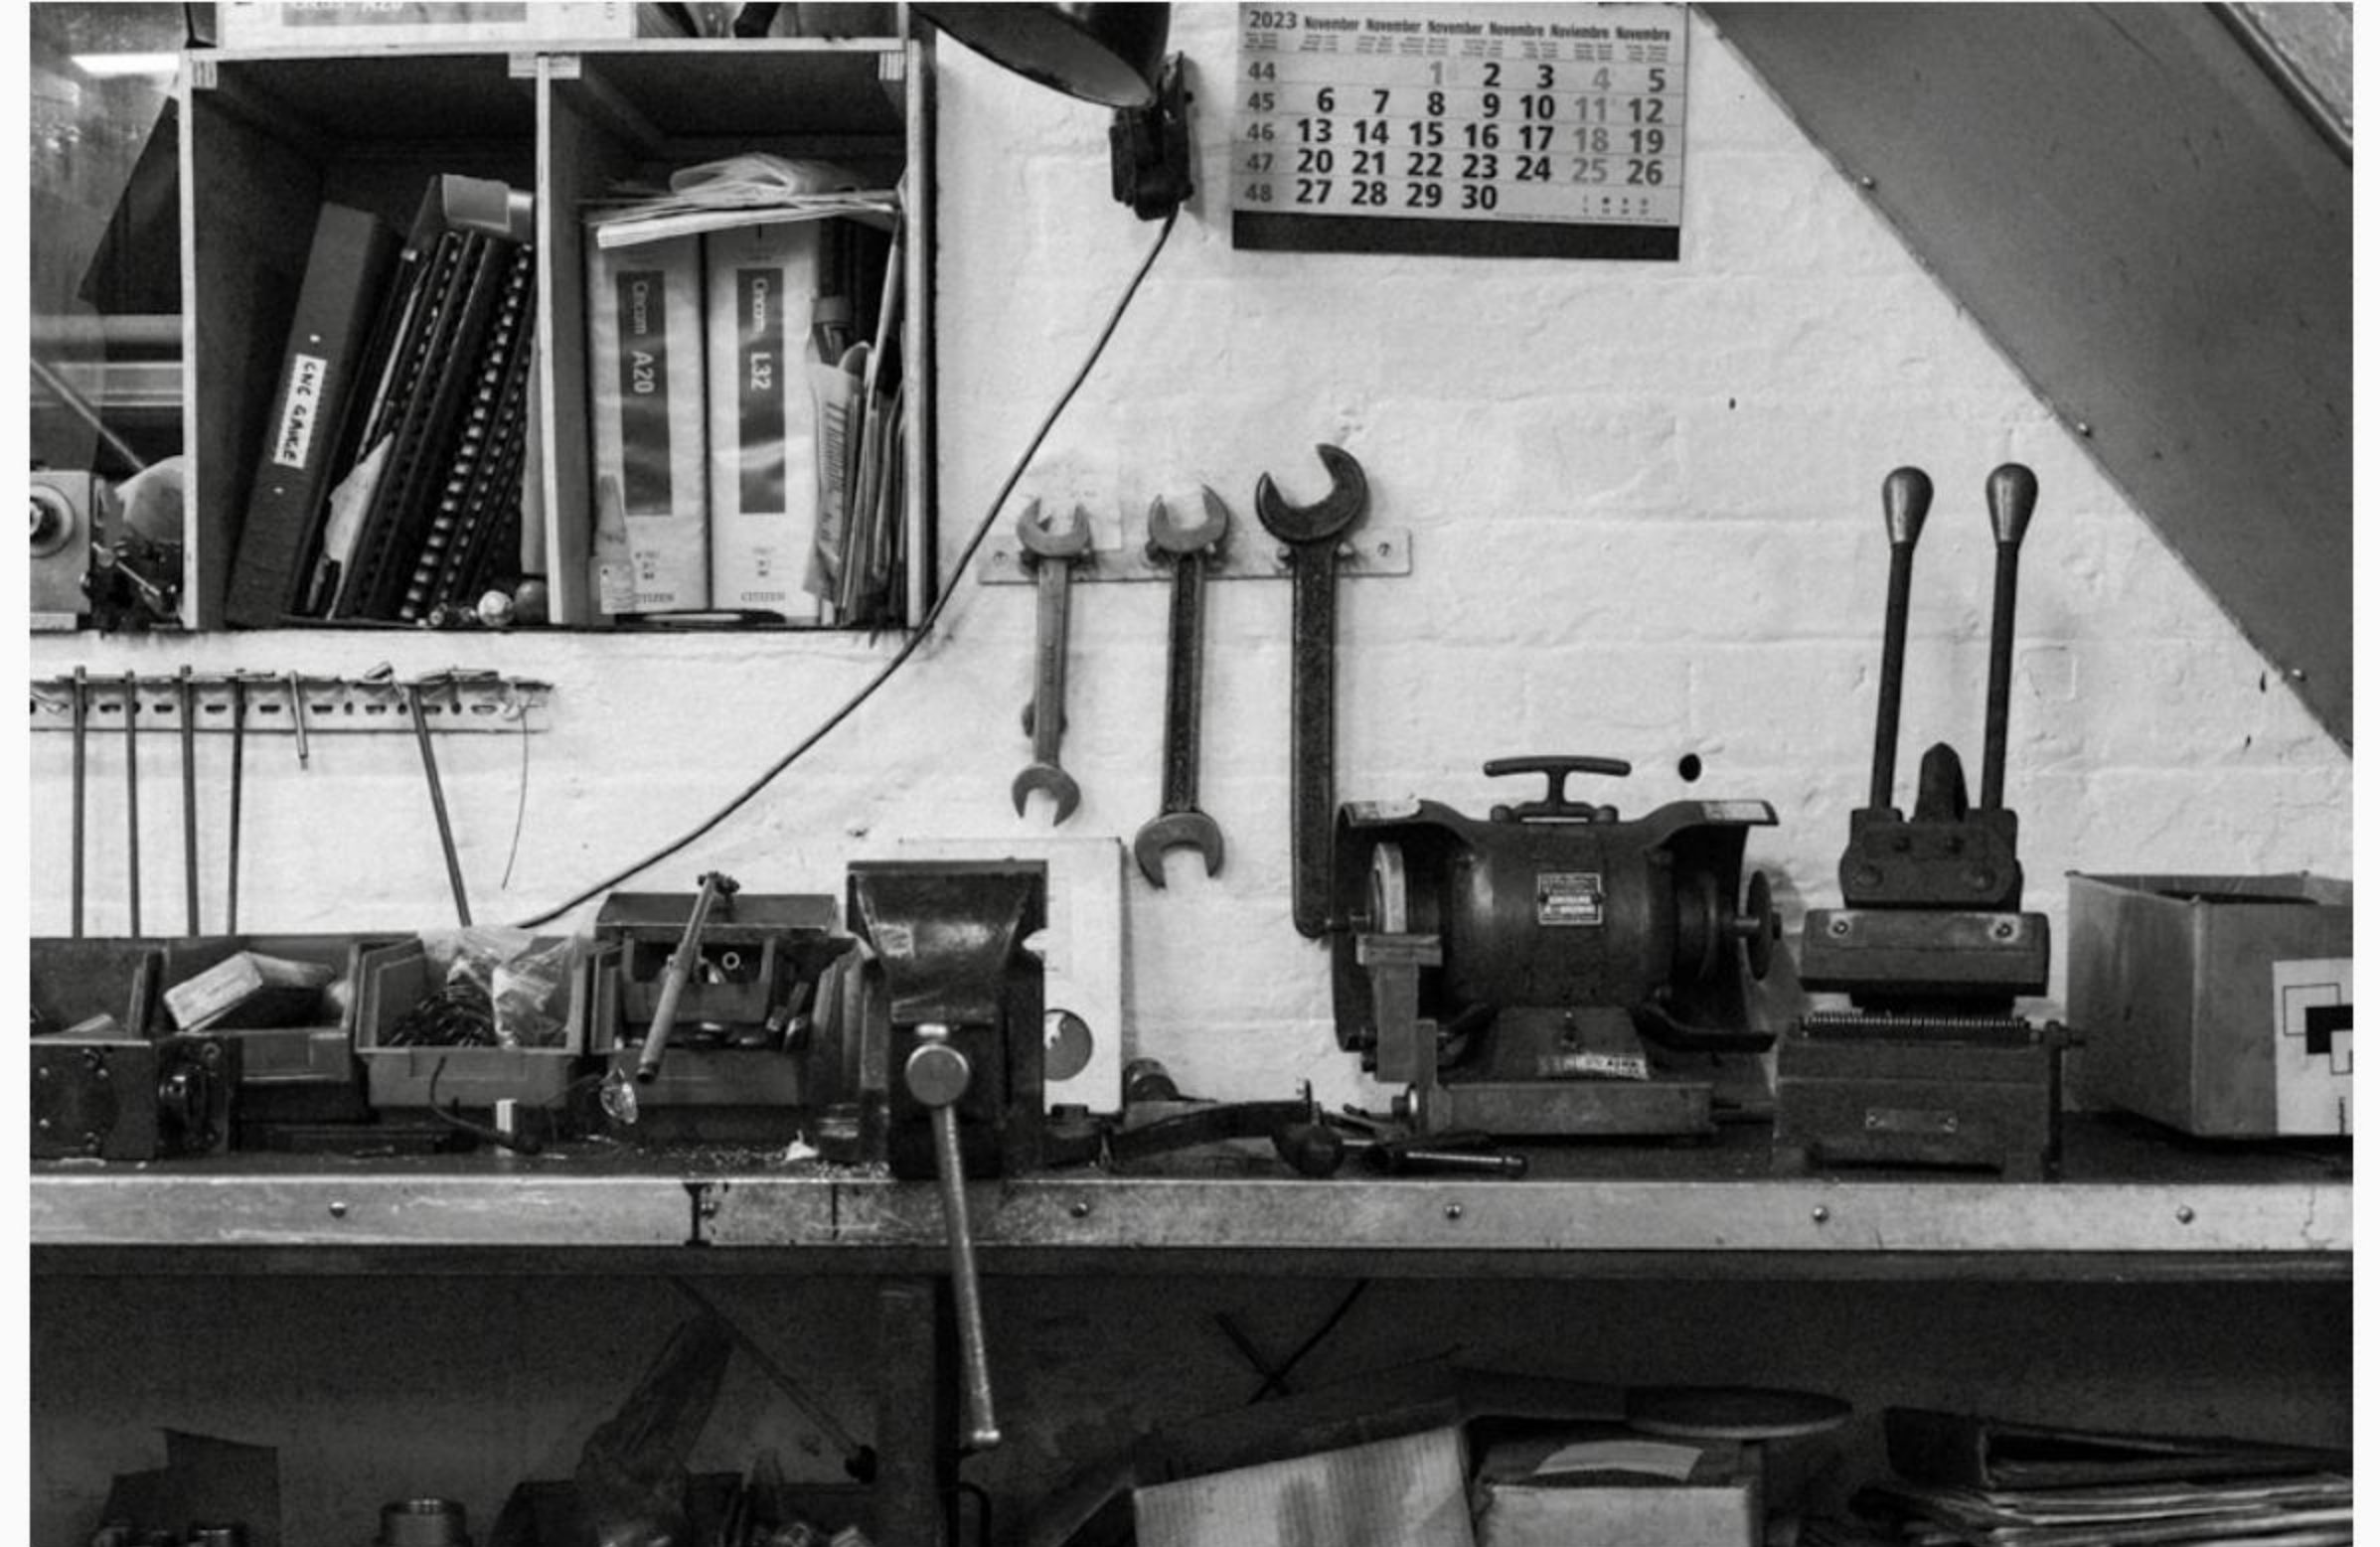

For customizable sockets, explore our wealth of euro plates and modules for one-of-a-kind sockets to suit your exact specifications.

Soho Combi-Grid® A Revolution in Choice

Not only have we meticulously crafted an extensive selection of products for each of our collections, we have pioneered the development of a proprietary combination grid system: the Soho Combi-Grid®. This innovation allows for the seamless integration of toggle, dimmer and rocker switches of any type and in any combination on a single plate, accommodating from one to 12 switch modules.

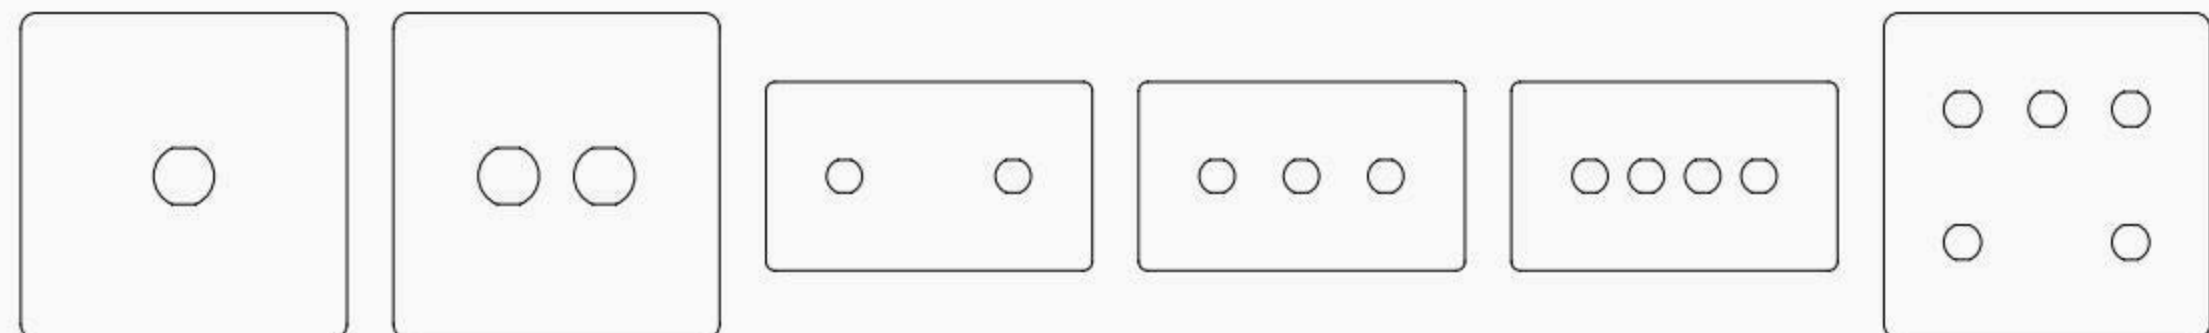

Front Loading Simplicity

At The Soho Lighting Company, we prioritise ease of installation. That's why all our grid frames are front loading. This ingenious design simplifies the installation process. Each module can be easily wired in and then securely clipped into place before the final touch - a flawless finish screwless faceplate - is fitted.
